'PF WaterWorks to Showcase PermaFLOW™ – Never Clog Drain' at the Greenbuild 2009

HOUSTON, TEXAS– Nov 10, 2009 – PF WaterWorks, the GREEN Drain management company, will be showcasing its 'Green by Design' PermaFLOW – Never Clog Drain system at the Greenbuild 2009 International Conference and Expo in Phoenix, AZ

Over 65% of all home owners will have to deal with a clogged drain this year. Most of them will resort to harsh chemicals polluting the water and potentially injuring or poisoning many humans and pets. Those that don't use chemicals will have to endure the cost and hassle of dismantling their drain to clear the clog.

There is now a better solution. PermaFLOW™ Never Clog Drain is engineered to prevent clogs eliminating the need for plunging, dangerous drain cleaners, messy drain disassembly, and associated health, safety and environmental concerns. Since the chemicals are no longer required, gray water pollution is reduced and it is available for recycling. PermaFLOW™ Drain also supports water conservation through efficient removal of stagnant debris with low flow rate faucets.

Green By Design

“This new 'Green by Design' multifunctional fixture provides a commonsense tool to reduce the time, effort and money needed for maintenance and has positive influence in the best practices of Green building”,. said Sanjay Ahuja, Vice President, PF WaterWorks.

PermaFLOW™ Drain is transparent for quick diagnosis of potential problems and also offers a smart emergency bypass option for water flow through the upper chamber, virtually eliminating any downtime. Further, accidentally dropped items (needles, jewelry, toys, coffee stirs etc) can be easily seen and removed.

PermaFLOW Drain is GreenSpec listed and has received several industry awards including 'Best of What's New' from Popular Science; '100 Best New Products 2008' from Professional Builder, PLATINUM ADEX Award for Design Excellence from Design Journal, and 'Product Innovator Award' from Kitchen and Bath Business.

For more information or to see PermaFLOW Never Clog Drain in action – please visit us at booth 4311 at the Greenbuild 2009 International Conference and Expo in Phoenix, AZ from Nov 10-13, 2009.
